16 CAUTION – AIDS TO NAVIGATION

The buoyage in Puerto Rico, and the Spanish and US Virgin Islands is well laid out. However, the USCG buoy tender only comes down to check, repair and replace buoys and lights every six months. There is no local authority that maintains or replaces missing buoys. If a buoy goes adrift or a light goes out one month after the buoy tenders trip, it will not be replaced or repaired for five months. Thus the buoyage on this chart cannot be regarded as absolutely reliable. (ILNW 641/17)

17 NOTICE TO MARINERS

This chart is no longer supported with notice to mariner corrections. No future notice to mariner corrections will be issued against this chart. (ILNW 465/18)

Corrections to notes on the chart reverse

PALMAS DEL MAR

Add new paragraph at end of section: A marina has been established in the Outer Harbour. The basin has been dredged to a depth of around 3·7m accordingly. If well-handled, yachts up to 125' are said to be able to use the marina but, with strong southeast winds, entrance is tricky. (ILNW 167/09)

PALMAS DEL MAR

Add to new paragraph: The marina has been upgraded, with all marina facilities - fuel, water, electricity, showers, launderette and yacht club - now available. (ILNW 66/10)

PUERTO PATILLAS

Add to end of first paragraph: The entrance to Puerto Patillas is now buoyed. However, it is advised to use eyeball navigation in good light and follow the above sailing directions. (ILNW 368/10)
